

Table E1 Score chart for estimation of the probability of necrosis after chemotherapy for metastatic testicular cancer with categorized versions of continuous predictors

Characteristic	Scores	Sum score
Primary tumor		
Teratoma elements	1	
Prechemotherapy tumor markers		
AFP elevated	1	
HCG elevated	1	
LDH elevated	1	
Postchemotherapy size		
<20mm	2	
20-49mm	1	
≥50mm	0	
Reduction in size		
Increase	-1	
0 – 49%	0	
≥50%	1	
Total score (add all)		...
Probability of benign tissue and 95% CI from Table 5		... % [...% - ...%]

Table E2 Probability of necrosis in relation to the sum score from Table E1

Score from Table E1	Predicted	Observed
0	4.2% [1.9-8.8%]	0/20 (0%)
1	8.7% [5.1-15%]	4/65 (6.2%)
2	17% [10-27%]	9/66 (14%)
3	31% [21-44%]	29/88 (33%)
4	50% [38-62%]	68/124 (55%)
5	69% [57-79%]	72/104 (69%)
6	83% [74-89%]	43/56 (77%)
7	91% [86-95%]	20/21 (95%)
